this book deals with theoretical problems that arise at points of contact between the concerns of philosophers and historians about the practice of historiography in bringing together these critical studies on diverse but related themes the book offers insight into the aims and methods of those working in theory of historiography in recent years especially in english speaking countries

those concerned with the practice of history as a discipline and as an intellectual activity will be intrigued by the view of history that François Furet offers in this collection of essays after twenty five

years as a professional historian at the *ecole des hautes etudes* and in the ranks of the *Annales* school Furet sets out to reexamine the methodological and intellectual cleavages that exist today among historians. Furet views history as a field bounded at each end by two ideal types. One end is concerned with the history of periods and with the empiricism of facts rather than received ideas; at the other end is problem-oriented history which substitutes for the supposed coherence of a period the analytical examination of a question. Furet's own work leans toward the second, more conceptually oriented kind of historiography. The essays in this volume, most of them never before published in English, illustrate the breadth of his approach. Furet's discussion ranges through Tocqueville's conceptual system to present-day America, from the origins of history in France to the Jewish experience in the late twentieth century. Among Furet's recurrent themes is the contention that the historian constructs the object or field of his research rather than receiving it from the past.

the leading narrative history that students love to read, now made more relevant and accessible.

This book advances the view that concentrated black power is the backbone of the Democratic Party and, as such, black empowerment represents the last hope for the US, both domestically and internationally. Through analyses of secondary data, historical archives, and a variety of political and economic statistical indicators, it examines the relationship between black empowerment and America's global stature across its history, exploring the socio-historical context in which obstacles to black empowerment have occurred and the strategies that have been adopted across time for its realization. An examination of what black political, legal, economic, and cultural power looks like, the fight for black empowerment in the USA makes an urgent call for the uplift and empowerment of the black population without which the nation faces irreversible political and economic dysfunction domestically and a loss of its status as a global superpower. As such, it will appeal to scholars across the social sciences with interests in racial and ethnic inequalities and contemporary American society.
